Internet Services

For over five years, SSSI has been a provider of high quality services in the field of electronic communications. Specialization includes web design, and the design and development of Web-enabled enterprise applications providing business-to-business, and business-to-employee, transactions via the Internet and corporate Intranet. We also provide Internet security across multiple platforms including Web Servers, Operating Servers, Firewall and Application/Databases.

Training Services

At SSSI, we have extensive experience providing a full range of training services. From customer needs assessments, to curriculum/courseware development and course delivery, our focus is on providing solutions tailored to our customers' needs. Training is provided via multiple delivery platforms including hands-on instructor led classes at our state-of-the-art Technology Center located in Columbia, Maryland.

Systems & Software Development

We provide expert services in Systems Engineering and Software Development following state-of-the-art methodologies. We deliver cutting-edge solutions that assist our customers in meeting their organizational goals and objectives. Our strengths include analysis, design, development and management of systems using Graphical User Interface (GUI) and Object-Oriented programming methodology, client/server, and relational databases.

Customer Support

Expertise and strong corporate capabilities surrounding Help Desk, Financial Management, Regulatory Support, Administrative Support and Network Support, are the spectrum of our Customer Support Services. We create customized solutions that maximize our customers' ability to reach their targets and goals.
